

6 WAYS TO CREATE THE ILLUSION OF SPACE

In a BI-DIMENSIONAL image the space is an illusion. Artists create the illusion of the space with six different ways you can find here below.

ACTIVITY: Watch the video and draw the spheres on the table, using a pencil.

WRITE THE CORRECT TITLE FOR EVERY DEFINITION ↓

↓ DRAW THE SPHERES AS IN THE VIDEO

<p>1. _____</p> <p>One object appears to be behind the other</p>	
<p>2. _____</p> <p>Light and shadow create the illusion of forms and space</p>	
<p>3. _____</p> <p>Objects higher in the picture appear to be in the distance</p>	
<p>4. _____</p> <p>Small objects look distant, while closer objects should be larger</p>	
<p>5. _____</p> <p>Lighter values and less details suggest distant objects</p>	
<p>6. _____</p> <p>Parallel lines and edges seems to go toward one or more vanishing points.</p>
